

SHANMUKHA CHENNUBOINA

AI ENGINEER • BUILDER • AIML ENGINEERING STUDENT

PROFESSIONAL SUMMARY

AI/ML engineering undergraduate who builds working AI products end-to-end — from an LLM-integrated VS Code extension to AI-powered platforms for education, campus systems, and healthcare. Hands-on with prompt engineering, AI agent design, and API-level LLM integration, translating AI concepts into shipped, user-facing software rather than coursework alone.

Portfolio shanmukh-portfolio.pages.dev

Location Bengaluru, Karnataka

AI TECH STACK

Programming

Python, JavaScript, HTML, CSS, C

AI

Prompt Engineering, LLMs, RAG, Model Context Protocol (MCP), AI Agents, Generative AI, AI Integration

Frameworks & Tools

FastAPI, Flutter, Supabase, Git, GitHub, VS Code

Databases

MySQL, Supabase

Cloud & Hardware

AWS Basics, NVIDIA Jetson Nano

Other

REST APIs, UI Design, Problem Solving

LANGUAGES

English • Telugu • Hindi

AI DOMAINS

Generative AI • AI Agents • Developer Tools
• Education Technology • Healthcare AI

EDUCATION

Presidency University, Bengaluru

B.Tech, Computer Science & Engineering (AI & ML) 2nd Year | Expected Graduation: 2029

Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures, OOP, Linear Algebra, Python

MAJOR AI PROJECTS

AutoDev — AI-powered VS Code extension for project scaffolding and developer assistance

- Architected a VS Code extension integrating the Google Gemini API to power AI-assisted project scaffolding, architecture advising, and in-editor developer support, with an offline fallback mode for uninterrupted use.
- Designed a Developer Memory System that tracks project context and history, using it to auto-generate structured, portfolio-ready content from real coding activity via prompt engineering workflows.

Tech: Google Gemini API, VS Code Extension API, Prompt Engineering, AI Agents

Career Forge — AI-powered platform turning scattered learning resources into structured career roadmaps

- Designed an AI career guidance system that converts curated YouTube playlists and learning material into personalized, skill-based learning roadmaps with progress tracking.
- Integrated LLM-powered assistance to provide contextual career guidance within a modern, responsive UI.

Tech: LLM Integration, Recommendation Logic, Responsive Web Design, EdTech

HealthSphere — AI-powered assistant for understanding and organizing medical information

- Built an AI system to analyze medical reports and simplify complex health data into clear, understandable insights using generative AI.
- Designed an accessible interface prioritizing clarity for non-technical users navigating personal health data.

Tech: Generative AI, Medical Data Processing, AI-Assisted Insights, UI/UX Design

Smart Campus Buddy — AI-powered university companion unifying campus navigation and student services

- Engineered an AI chatbot to serve as a campus assistant, streamlining student queries and access to campus services.
- Integrated smart navigation, issue reporting, lost-and-found, and event/study collaboration into one centralized platform.

Tech: AI Chatbot Development, Smart Navigation, Community Platform Design

Game-Like Interactive Portfolio — Immersive, gamified portfolio replacing a traditional resume-style presentation

- Designed and developed an interactive portfolio using animation and gamified navigation to present projects, skills, and technical experience.
- Engineered interactive UI/UX elements for an immersive experience distinct from conventional portfolio formats.

Tech: Frontend Engineering, Interactive UI/UX, Animation, Gamification

CERTIFICATIONS

- NVIDIA** — Jetson Nano, AI on Edge
- Anthropic** — Model Context Protocol
- AWS** — Generative AI Foundations
- Elements of AI** — Foundations of AI
- Google** — Analytics Certification
- Simplilearn** — Intro to AI & ML
- IBM** — AI Agent Development
- Anthropic** — AI Fluency
- Microsoft** — AI Fundamentals
- HackerRank** — Problem Solving / Python
- HP LIFE** — AI Skills

TECHNICAL HIGHLIGHTS

- Built multiple AI-powered products end-to-end, spanning developer tooling, education, campus systems, and healthcare.
- Hands-on experience integrating LLM APIs (Google Gemini) into working applications.
- Practical, applied understanding of prompt engineering, AI agents, and Model Context Protocol (MCP).
